-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Applicant's election of Group I, claims 1-30 and 46-47 with the first species in claim 35 as elected species in the reply filed on 7/28/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 and 46-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chem Abstract 128: 41551.

The reference discloses silver halide photographic material containing thiophosphine as sensitizer (see Abstract) in that specific structure has been disclosed at page 13 of the search).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed first polymerizable component nor the claimed specific species, as elected. However, the reference does disclose that the thiophosphine is used as sensitizer in the composition to form photographic material. That means another component must be present with a thiophosphine to form the product. Further, the difference between the structure of the claimed species and the reference is the aromatic ring with 3 repeating unit in the reference has attached a CF<sub>3</sub> group. However, it does not affect the

Art Unit: 1711

mechanism to form the claimed products. Therefore, it would have been obvious to one of ordinary skill in the art to select the first polymerizable component from the reference to react with thiophosphine to form a similar product, based on the same mechanism, in the absence of a showing of unexpected results derived from said selection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
